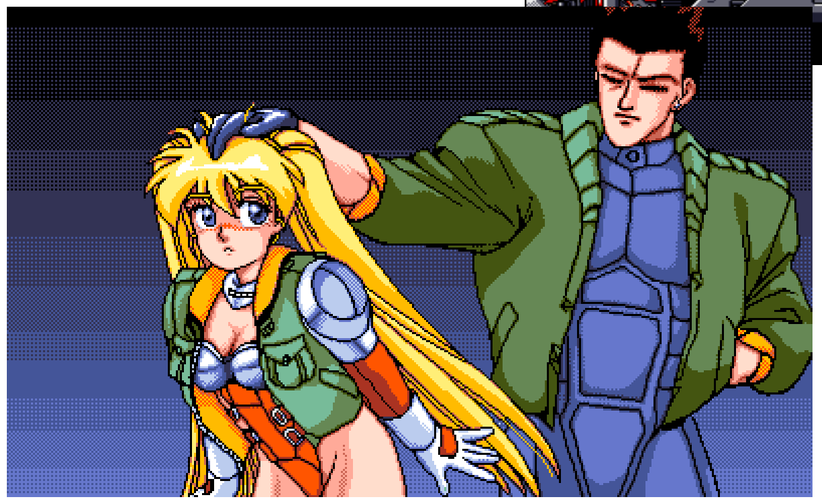
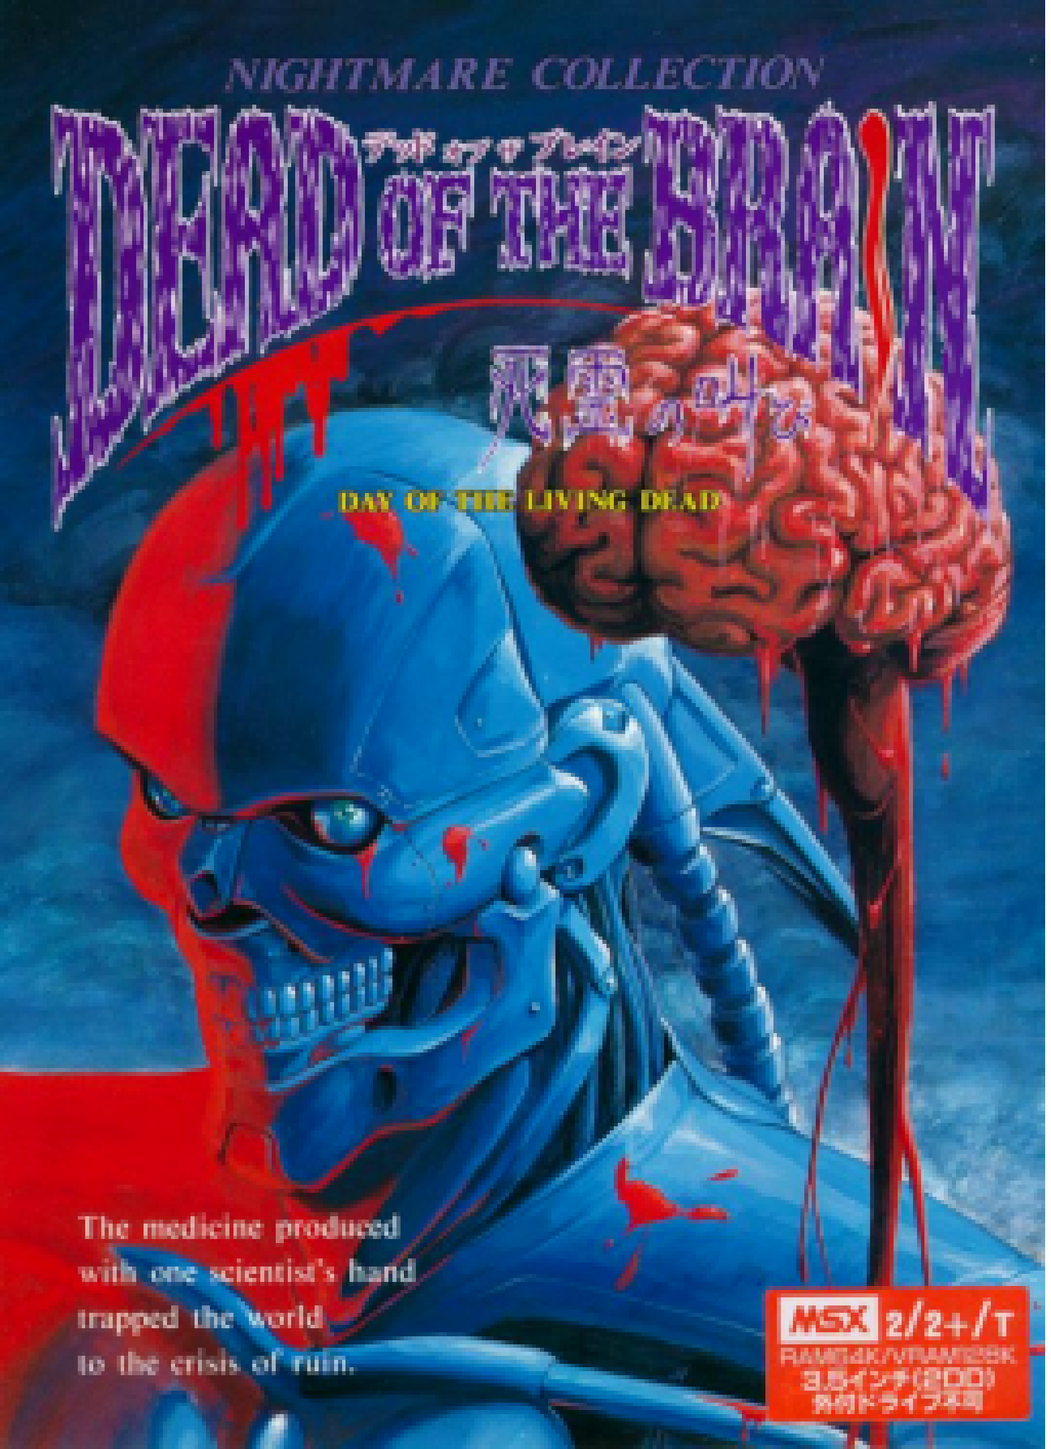
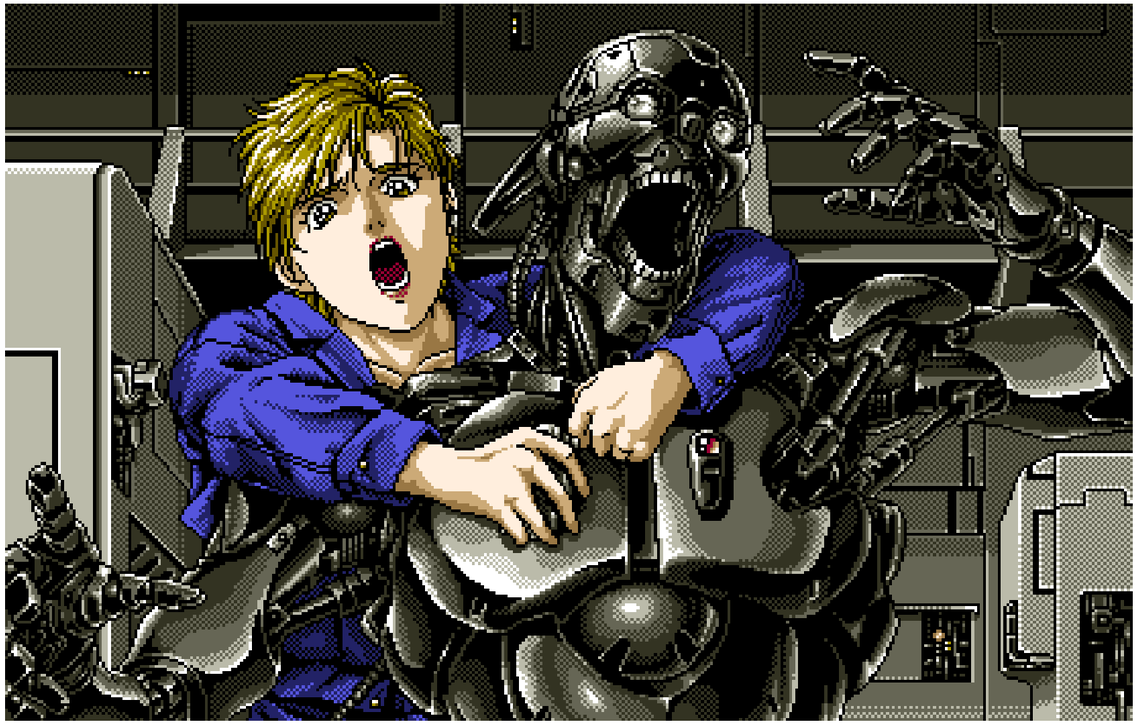
- **<u>Briganty: The Roots Of Darkness</u>** is a good game for the system if you are searching for an actual Action game. We have a **Beat ‘em up** game here with a mix of rpg... visual novel genres and adult stuff. The Soundtrack is really really good.. Something usual in this system. Japanese is a problem to you? Dont Worry... This game have a translation in the internet so you can play in english.



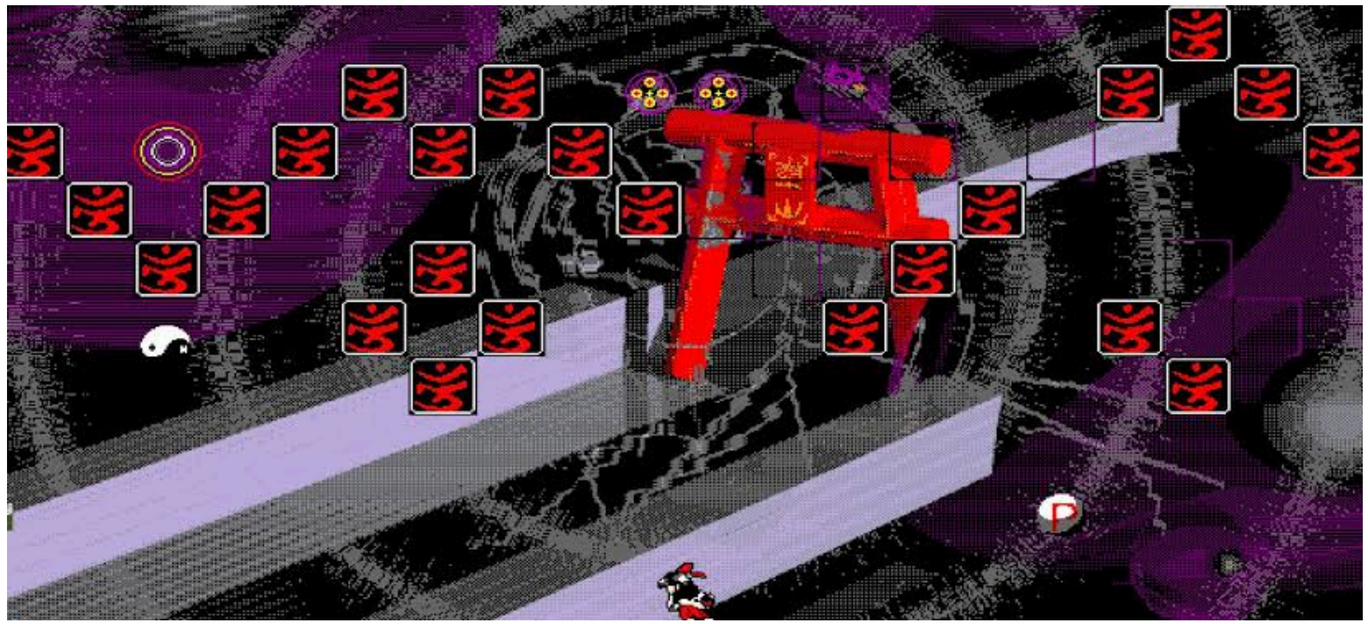
- **Edge** is another **Beat ‘em up** game for PC-98 and seens like this game have a strider inspiration... we have light adult stuff too and astonishing soundtracks. Love this cyberpunk apocalipse vibe by the way.

If you like Castlevania games, you need to check **Rusty**. There is no doubt that we have so much inspiration here... We have a beatiful anime style green hair woman with a whip. Plus the game resembling vampire killer from msx... so its like a metroidvania too... you need to find the keys to open doors. I really like this game... The Soundtrack is a piece of cake.. Its so hard but if you have determination you can finish the game.

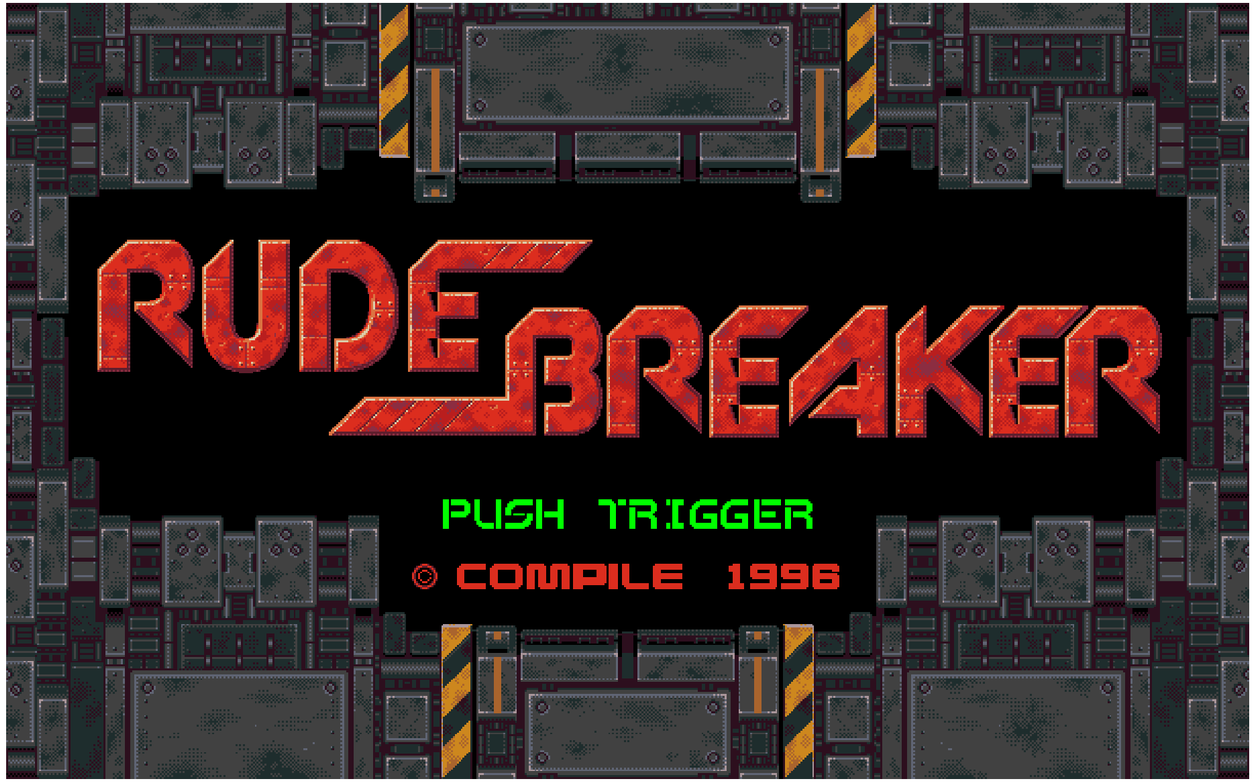


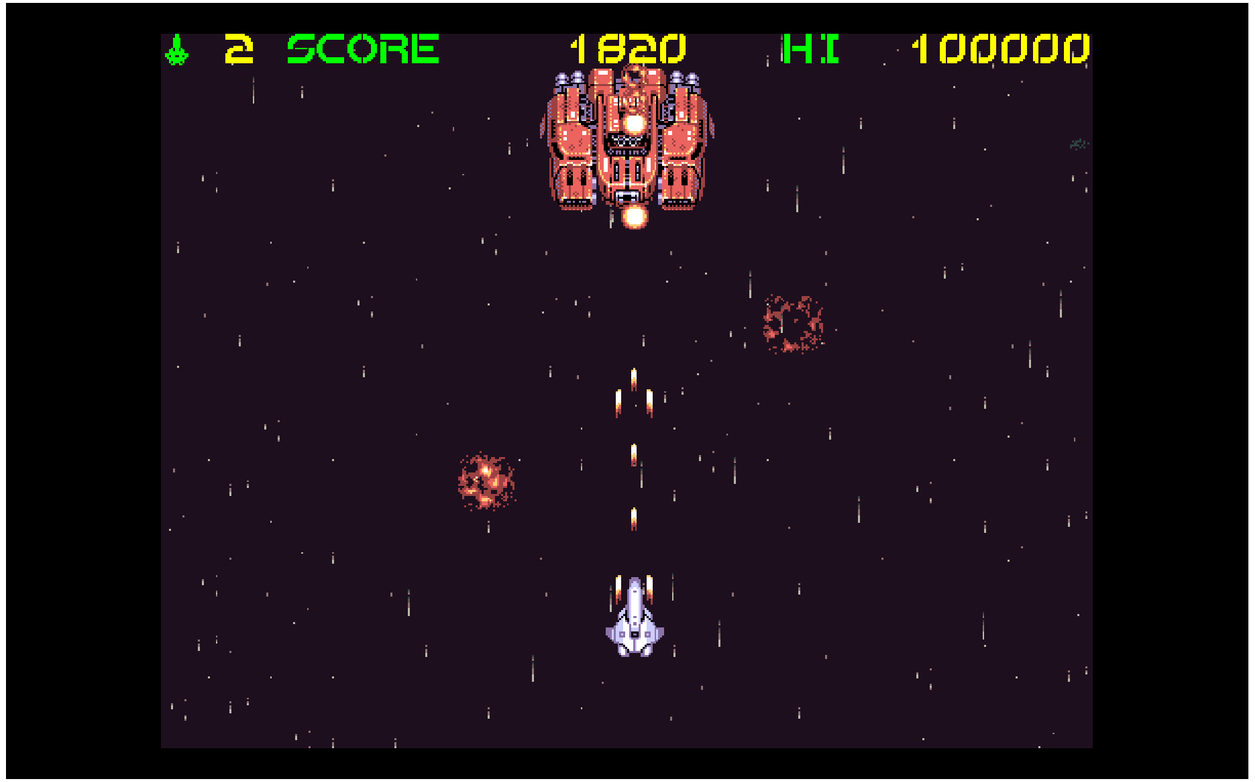


One of the best games i ever played is definitly **Dead Of The Brain** for PC-98. Seens like a Terminator inspired game... Its a **Point and Click** with **horror vibe**. Yes, we have translation for this one so.. have fun!



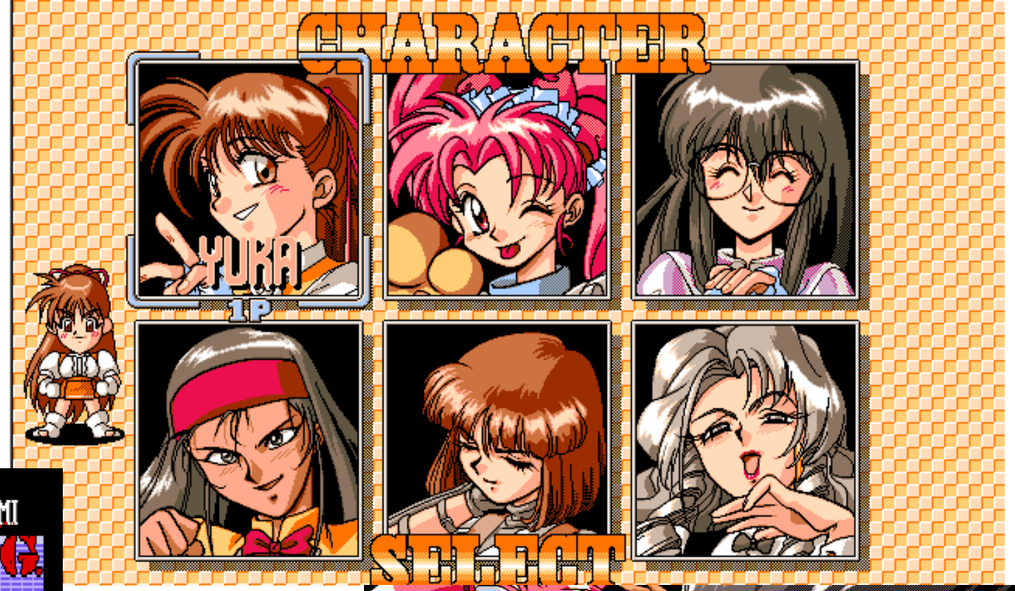
<u>Touhou:Highly Responsive to Prayers</u> is a classic. The first game is so unique.. Feels more like an arkanoid vibes than a shooter.. like other touhous in the future.



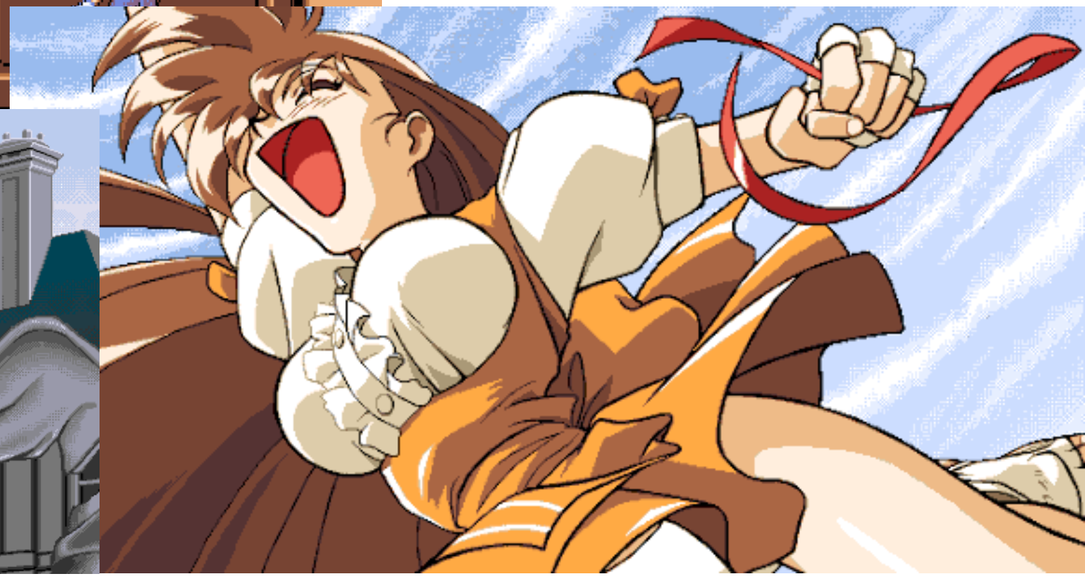


Rude Breaker is a good one from Compile if you are searching for **shoot ‘em up** games for the system... The Soundtrack is unforgetable... Not hard too.

another good **shoot ‘em up**.. **Burning Dragon Plus**... Yeah... We have an old version Called just Burning Dragon but is not that easy. The Plus version is not that easy too you need to complete the 2nd loop of the game to finish... but if you die you can continue in the same spot unlike the previous game and have other quality changes... Enjoy!

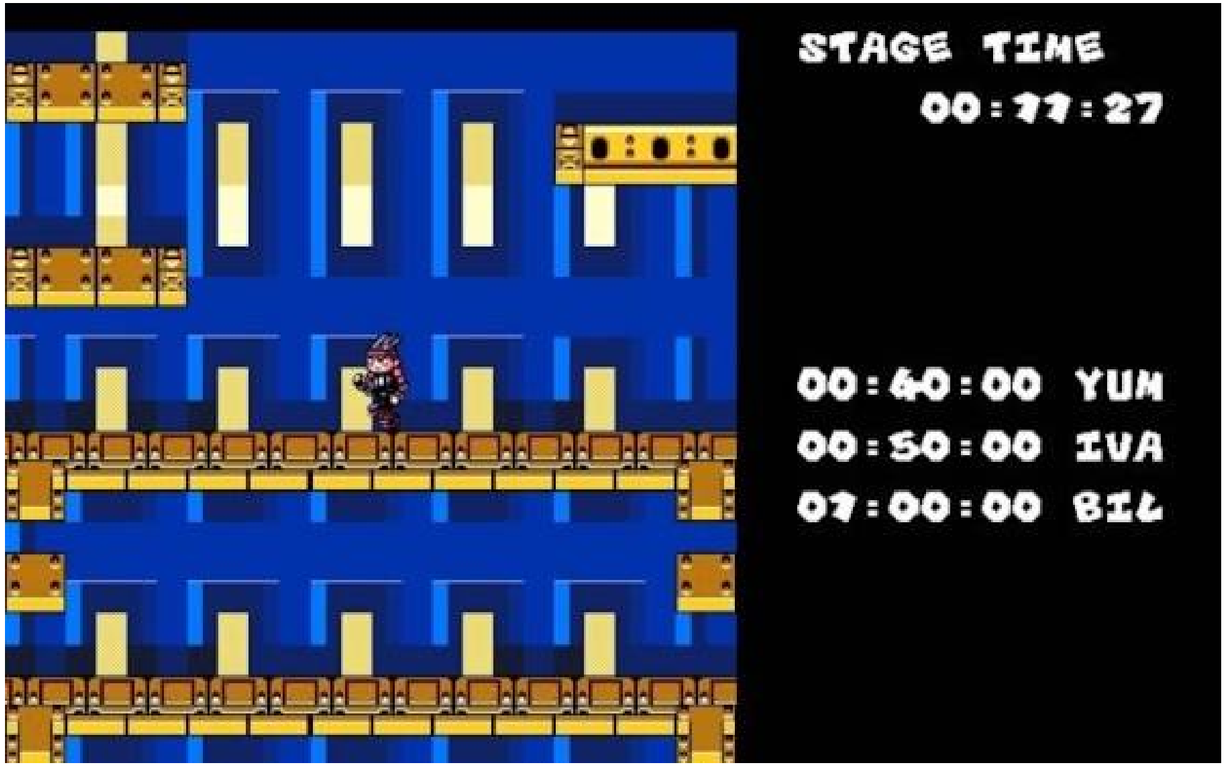


<u>V.G Variable Geo</u> is a good option if you are looking for a **Fighting** game we fight with anime girl style and after each win you get her “content”. Good Soundtracks and amazing scenarios.



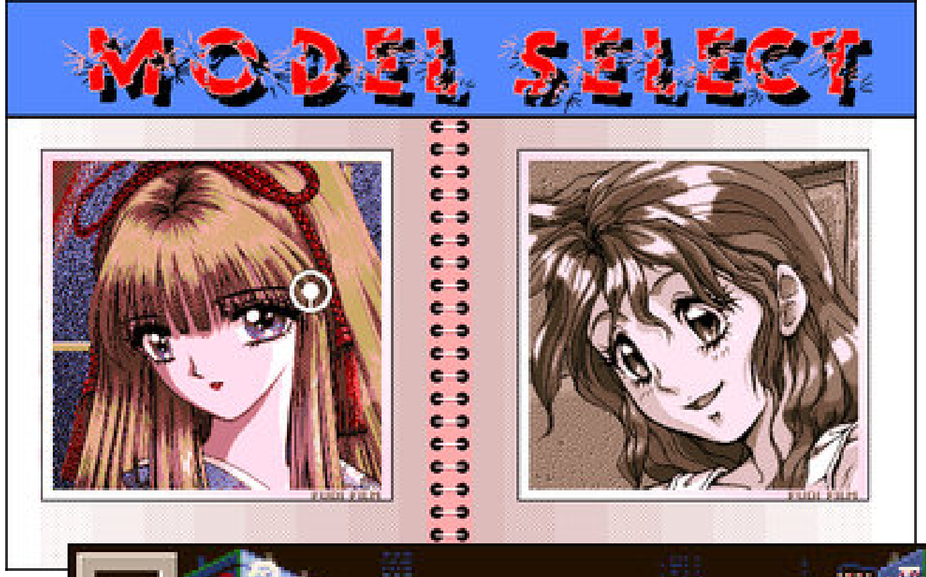
Fortunally... The game have a sequel that is **VG II: The Bout of Cabalistic Goddess.** Have Fun!　・(〃^ ᴗ ^〃)・

Totsugeki Mix is an interesting one.. is like a spiritual sucessor of Rusty... We have a **plataform/metroidvania** game. You can choose any girl you want.. the girls have different styles of gameplay too.



In **Jump Hero** all you just need to do is jump... Is an interesting **plataform** game since you move in vertical.. So short... have good soundtracks. You have to check it!

Marble Cooking maybe is a good option if you like **Puzzle**. We have adult content after you win the level too... if i remembered well they are odd by the way 😅.



Binyu Hunter is a **shooter** game like Wild Guns (SNES) you know? Have this amazing futuristic vibe too. After finishing the levels you can choose 1 girl to take photos of her.
